Málaga, the perfect city

Málaga, capital of the Costa del Sol, is a cosmopolitan, open, culturally rich, modern city with a great historical heritage. Málaga is the birthplace of Pablo Picasso and it has an important international airport with more than 18 million passengers a year. It also has a seaport and a high-speed train connection

A leading technology park

Málaga TechPark is located 13 km away from the city centre of Málaga, 12 km away from the airport and 7 km away from the University, an ideal location to work in a high quality environment. With more than 30 years of history, Málaga TechPark is a public-private collaborative initiative, with the Junta de Andalucía (regional

A driving force for the economy and innovation

The contribution of Málaga TechPark to the GDP and employment of the province of Málaga is around 8.6%, which represents 1.75% of the GDP and employment of Andalusia. A place where more than 100 companies are created every year. Today, there are more than 650 companies established in the park,

High-quality infrastructure

Málaga TechPark offers high-quality services and infrastructures that meet the needs of companies and their workers. With excellent telecommunications infrastructures, the park has a wide range of services, such as an international school, a

Where the world's leading companies are

World leaders in the IT sector have chosen to establish their headquarters and R&D centres in Málaga TechPark. More than 60 international firms are currently set up in the park: companies such as Oracle, Ericsson, Accenture, EY, Dedalus, Indra,

to Madrid (2 hours and 35 minutes). With 245 days of sunshine every year, an average temperature of 18° C, 56 golf courses, 16 international schools, 1.6 million inhabitants and more than 140 nationalities, Málaga is considered the best place to live and work with a high quality of life at very competitive prices.

government of Andalusia), the Málaga City Council, Unicaja and the University of Málaga as shareholders. Moreover, Málaga TechPark is the global headquarters of the International Association of Science Parks and Areas of Innovation (IASP) and the Association of Science and Technology Parks of Spain (APTE).

more than 24,000 employees, a turnover of more than 2,700 million euros and more than 60 companies of 30 different nationalities.

nursery school, a hotel, a sports centre, a heliport, information, security, numerous restaurants and a petrol station, as well as countless areas for holding meetings and events.

Keysight Technologies, TDK, PwC, OPPLUS, Mades, Dekra, The Workshop, Vodafone, Orange, Grupo Premo, AERTEC Solutions and Capgemini.

A strategic alliance with the University of Málaga

The University of Málaga and Málaga TechPark have been collaborating closely to build an important network of knowledge transfer and technology dissemination, with the aim of promoting research and development from within the university. Both institutions have implemented another project called Digital

Eye Observatory, whose aim is to combine and concentrate efforts in the technology field, as well as to carry out activities of dissemination, promotion, training, advice and technology innovation, which lead to better strategic positioning and decision-making by companies and institutions involved in the sector.

The birthplace of IT talent

Málaga, mainly thanks to the University of Málaga, is the birthplace of highly-qualified IT talent, as it has more than 4,000 students specialising in this field. There are currently more than 10,000 jobs in the IT sector in the park.

In addition, compared to cities such as Madrid or Barcelona and other European capitals, Málaga offers a high quality of life at very competitive prices, which makes it easier for companies to attract and retain talent here.

Global entrepreneurship: The Green Ray

Entrepreneurs are one of the most essential parts of Málaga TechPark ecosystem. The park has six business incubators in order to foster the success of new projects. On the other hand, The Green Ray by PTA-UMA is an initiative in which both Málaga TechPark and the University of Málaga have collaborated

in order to promote global entrepreneurship. The development of this initiative, which seeks to boost business excellence, is being carried out in a building located in the campus of the University of Málaga, 7 km away from Málaga TechPark and 15 minutes away by metro from Málaga.

Cooperation structures

Málaga TechPark is an institution in constant development. Seeking synergies and cooperation with other institutions and companies and developing projects related to innovation and technology are the starting points of several initiatives launched by the park. One of them is the Málaga TechPark

Execs Executives Club, a business alliance between the CEOs and general managers of the park's companies. It was created to strengthen links and synergies between the park's executives.

Tailored spaces for companies

Málaga TechPark has all kinds of spaces for innovative companies. The technopolis has offices from 20 square metres to 2,000 square metres for rent and sale, as well as a wide range of plots with all types of infrastructures and services for the construction

of industrial or R&D centres. Málaga TechPark provides personalised advice when choosing the most suitable location in the park for your business project.
